

# RAPHAEL PORTELA

SOFTWARE ENGINEER

## PROFILE

I am a software developer currently improving my backend skills. I worked professionally with react for 18 months in robust applications, and acquired experience with the whole react ecosystem - testing, state management, class and functional components. I'm always striving to learn and build a solid foundation on my knowledge

## SKILLS

### Familiarized

Python, JIRA, Agile processes, Firebase

### Strong

NodeJs, React, Angular, React Native, Typescript, Javascript, Postgresql, HTML, CSS, NextJs, Consuming APIs, jest/enzyme, Postgresql

## EXPERIENCY

### Powtoon (visual native)

April 2022 to May 2023

- Frontend software engineer

Worked directly with state management, code testing, and improving services that use feature toggles to organize resources based on licenses. Implemented accessibility requirements in the application using tools such as focus-trap-react and AxeDevTools. Contributed to the system optimization, enhancing pagination and reducing dashboard load times for user presentations.

### Leadup Digital

August 2020 to November 2020

- React and React native Developer

Implement solutions on projects, integration with firebase.

Worked with real time geolocation functionalities and maps on mobile and web

### Rocketseat Student

- Educational community focused on javascript and fullstack development.

## EDUCATION

### UFMA(Federal university of Maranhao)

Science and Technology

2015 to 2018(unfinished)

### UNDB

Bachelor of Software Engineering(graduating)

- Started on 2019
- Finish on middle 2023
